PROFESSIONAL SUMMARY

AI Engineer and co-founder of DACE Agency, building AI agents, LLM-powered applications, and end-to-end workflow automation for international clients. Top Rated on Upwork with 70+ completed projects and a 100% Job Success Score. Hands-on prompt engineer across the OpenAI and Anthropic APIs; ships production automations in n8n, Make.com, and GoHighLevel, and uses AI-assisted development to design and deliver complete websites and UI/UX end to end. Experienced across the ML pipeline — from data labeling and preprocessing to project execution — and currently deepening LLM engineering (transformers, RAG, multi-agent systems) through a structured daily study roadmap. Long-term goal: launch an AI-powered SaaS product and pursue a Master's in AI abroad.

EXPERIENCE

CO-FOUNDER & AI AUTOMATION LEAD

June 2024 — Present

DACE Agency

Remote

- Co-founded an AI and automation agency delivering AI agents, custom workflows, and LLM applications to clients across real estate, finance, lead generation, and operations.
- SuitesForAll:** built an AI listing engine (n8n, GPT-4, Cloudinary, Python/Flask microservice) that auto-generates vacation-rental listings and image variants from a Google Sheets data layer.
- OntologyOS:** built a multi-agent knowledge-graph prototype with four specialized agents (generation, review, compliance, refinement) for a branding firm.
- Built a Make.com workflow that pulls Monday.com data, fills multi-form fillable PDF packets, and delivers them via email and Google Drive for a US leasing client.
- Designed and shipped the DACE Agency website end to end using AI-assisted development — UI/UX, branding, and a custom animated front end in HTML/CSS/JavaScript.

AI AUTOMATION ENGINEER (TOP RATED)

February 2020 — Present

Upwork — Freelance

USA / UK / Remote

- Top Rated freelancer with a 100% Job Success Score across 70+ projects spanning workflow automation, AI agents, LLM integration, prompt engineering, and API work.
- Delivered automation builds in n8n, Make.com, Zapier, and GoHighLevel, maintaining repeat clients and 5-star reviews.
- Designed and tuned production prompts and agent behaviors for client LLM workflows (extraction, classification, generation, routing).
- Earlier engagements (2020–2021): built ML training datasets and technical-drawing annotations for engineering and computer-vision projects using CVAT and LabelBox.

ML/AI DATA ANALYST INTERN

[add dates]

Visionbotix

Islamabad

- Completed an ML/AI data analyst internship (SZABIST-accredited): dataset preparation, analysis, and reporting for machine-learning projects.

SELECTED PROJECTS

- DataLab:** web-based, AI-driven data-preprocessing platform (BS Artificial Intelligence final-year project).
- Forex Research Stack:** multi-source trading-analysis setup integrating MetaTrader 5 with custom MCP servers, TradingView, and market-data APIs (Alpha Vantage, fastFOREX, Forex Factory).

EDUCATION

BS Artificial Intelligence — SZABIST Islamabad

Aug 2021 – Feb 2026

Coursework: Deep Learning, Machine Learning, Data Mining, Programming for AI.

FSc Pre-Engineering — Metropolitan International University & College

2019 – 2021

O-Levels — The Mount Sinai School

2017 – 2019

SKILLS

AI Agents & Automation: n8n, Make.com, Zapier, GoHighLevel, Retell, AI agents / agentic workflows, REST APIs, webhooks

LLM & Prompt Engineering: OpenAI API, Anthropic Claude API, prompt engineering, tool / function calling, Claude Code, MCP (Model Context Protocol)

AI-Assisted Web & UI/UX: end-to-end website design and build with AI coding tools, HTML, CSS, JavaScript

Data & ML: Python, data labeling & annotation (CVAT, LabelBox), data preprocessing, Google Sheets, Airtable, Cloudinary, HubSpot, Git/GitHub

Currently expanding: RAG systems, LangChain / LlamaIndex, LangGraph multi-agent orchestration, AWS (Bedrock, Lambda, S3), LLM internals (transformers)

COURSES & LANGUAGES

How Transformer LLMs Work, Deep Learning, Supervised & Unsupervised Machine Learning, Introduction to Python (all Coursera)

English (Fluent) • Urdu (Native) • Punjabi (Conversational)
